Autoglass® wins Fleet Supplier of the Year at the Fleet News Awards 2014

On 19th March, Autoglass® was named Fleet Supplier of the Year at the Fleet News Awards, as well as picking up the award for Cost Saving Initiative of the Year, for the company's use of new driver efficiency tool Eco-Drive, powered by Lightfoot.

The Fleet Supplier of the Year award is designed to identify the fleet supplier which has gone the extra mile to provide exceptional service to fleet customers. Autoglass®'s proven delivery record, high quality service, reliability and great value offering, combined with its significant investment in servicing fleet customers, meant that it picked up the top award, seeing off competition from a range of different service providers.

Jeremy Rochfort, National Sales Manager, at Autoglass®, said: 'We are over the moon to have been named Fleet Supplier of the Year at the 2014 Fleet News Awards. The award is a testament to the reputation we have built among those in the industry and a reflection of the unparalleled level of service which we can offer to fleet customers. Our aim is always to work in partnership with fleets and over the past year we have refocused and invested heavily in the right people and service to cater to the specific needs of fleets.'

Meanwhile, Autoglass®'s introduction of Lightfoot systems across its 1,100 strong fleet saw it pick up the award for Cost Saving Initiative of the Year. The self-managing driver efficiency tool cut 15% from total fuel costs by helping drivers to self-manage and improve their performance, without feeling like they are under 'big brother' surveillance.

Ged Raymond, Fleet Manager at Autoglass®, said 'The Lightfoot system has improved the safety and efficiency of our drivers, as well as providing substantial savings benefits. We've seen our drivers go from spending 55%-60% of their time in the green zone to achieving 90% and higher, and this has significantly

lowered our fuel costs. The technology has proved popular with our staff and the partnership has delivered tangible business benefits, and we are delighted to have the initiative recognised by Fleet News.'
